

YUPO Tako®

A new temptation for the creative appetite

Tako means octopus in Japanese. The new **YUPO Tako®** sticks to flat surfaces just like an octopus, because of its micro-suction structure. It uses no adhesive and therefore leaves no stickiness on the label.

YUPO Tako® sticks to flat surfaces and can be removed as many times as you want. It is neither a self-adhesive label nor a static film. There is no adhesive or glue involved, so there is no stickiness or glue residue remaining on applied surfaces after use. In addition, it is easy to use and bubble-free. The word Tako means octopus in Japanese. This product is aptly named because of its patented micro-suction structure on the back which resembles the tentacles of an octopus. It is not made of PVC and is therefore environmentally friendly and its base materials are 100% recyclable.

YUPOTako[®] sticks to flat surfaces and is easily removed. It leaves no residual glue or stickiness, is easy to use and bubble-free
