

Kongsberg C series

The new dimension for digital finishing

Kongsberg C presents a new wide-format world with higher volumes and faster turnaround times on a vast selection of materials. It's time for a digital finishing solution that fits today's digital production requirements without compromising on size, versatility or finishing quality. The Kongsberg C series is the first multifunction super-wide digital finisher for signage, display and packaging applications.

The Kongsberg C processes the widest variety of materials with an extensive range of applications. Paper, textiles, corrugated board up to triple-wall, honeycomb or fluted core board, plastics, aluminium composites, and more. It has the highest throughput of any super-wide digital finisher and delivers consistent performance.

KEY FEATURES

- The first multifunction super-wide digital finisher.
- Carbon composite traverse.
- High-powered milling.
- Speed and power on demanding materials.
- Complete set of advanced, quick-change tools.
- Roll feeder.
- i-Cut production console.

APPLICATIONS

- Signage
- Display
- Packaging
